HCLSoftware

Automation Orchestrator Suite

Organizations need speed, agility, and innovation to drive more cost-efficiency, customer-centricity, and productivity with their business operations. The Automation Orchestrator Suite will transform your organization with a powerful solution designed to streamline complex IT and business processes.

This solution empowers organizations to achieve efficiency, scalability, and agility by automating repetitive tasks, optimizing hybrid cloud management, and accelerating DevOps. It delivers end-to-end process automation tailored to your needs, enhancing IT operations, reducing costs, and ensuring compliance. By providing actionable insights for smarter decision-making, it drives digital transformation and simplifies workflows, allowing improved productivity and the ability to focus on what matters most—innovation and growth.

The Automation Orchestrator Suite comprises HCL Workload Automation, HCL Intelligent Operations and HCL Universal Orchestrator. It provides an enhanced automation platform based on HCL Workload Automation, with the all-new Universal Orchestrator to empower complete cloud native scenarios.
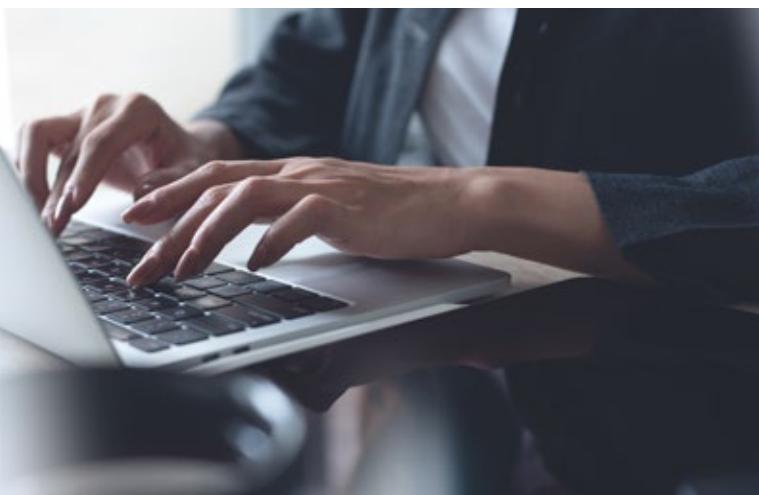

Suite Offering

Workload Automation

HCL Workload Automation boosts your operations with the most advanced job scheduling, management, and monitoring capabilities to seamlessly orchestrate complex workflows across multiple platforms and applications.

This platform acts as a meta-orchestrator for continuous automation, leveraging containerization and an intuitive user interface, while offering the lowest TCO on the market. All in one place.

Capabilities

- Faster workflow execution for cloud and on-premises workloads

- Supports serverless orchestration

- Optimizes data exchanges between tasks

- Connects & automates IT and business processes

- Single point of control for the workflow modeling and monitoring

- AI-based workflow prediction

- Self-scaling for Universal Orchestrator microservices on Kubernetes

- Active-active multi-server architecture with automatic workload distribution

Intelligent Operations

Strategic solutions enabling enterprise automation and innovation. These include:

Clara - Conversational UI promoting democratization and self-service automation with natural language processing interactions.

Hero - Effectively combines centralized application monitoring with Runbook automation, providing a solution dedicated to Workload Automation, making your infrastructure easy to control and hassle-free.

AIDA - AI & ML built-in patterns to capture and control process execution. Enables fast troubleshooting and data-driven decision-making to guarantee stability through risk assessment.

T-VREX – An innovative and versatile solution integrated with Workload Automation, enabling a complete and immersive troubleshooting and collaboration experience.

Universal Orchestrator

HCL Universal Orchestrator is a hyperautomation enabler providing visibility, mapping for tasks and processes, orchestration of work across multiple systems, complex rule engines, and configurable workflows.

Benefits

Digital transformation booster

The HCL Automation Orchestration Suite promises to deliver on today's modern IT environments including cloud-native infrastructure and big data workloads. Our new offerings will unlock further value by aligning to your strategic goals and promise to be robust, reliable, and flexible throughout your digital transformation journey.

Lowest TCO in the market

Stop worrying about costs, start enjoying all the features. The HCL Automation Orchestration Suite is proven to save you up to 40% TCO based on competitor's average without any additional hidden costs.

Simplify and control complexity

The Suite provides a single console and an automation engine to manage complex workloads and data pipelines. This minimizes complexity and increases speed and agility by enabling a single platform to manage all operational processes, as opposed to relying on a mix of separate tools.

A full range of services

Take advantage of the wide range of services offered by the best experts. We can aid with upgrades, migration, implementation, application integration and health check. Moreover, we cover your needs and detect them for you with on demand workshops, to deep dive into product features or business scenarios implementations.
